

HOTEL MANAGEMENT SYSTEM FINAL FEEDBACK.

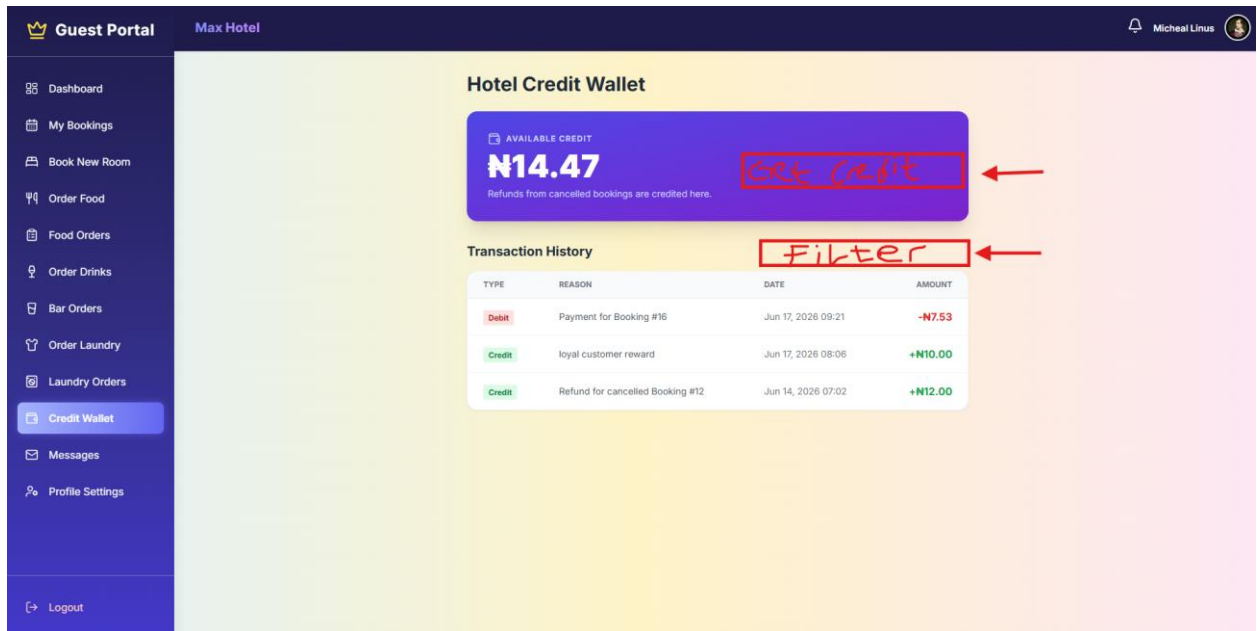

- Hotel Logo uploaded from branches settings isn't shown on the dashboard or on the booking website.

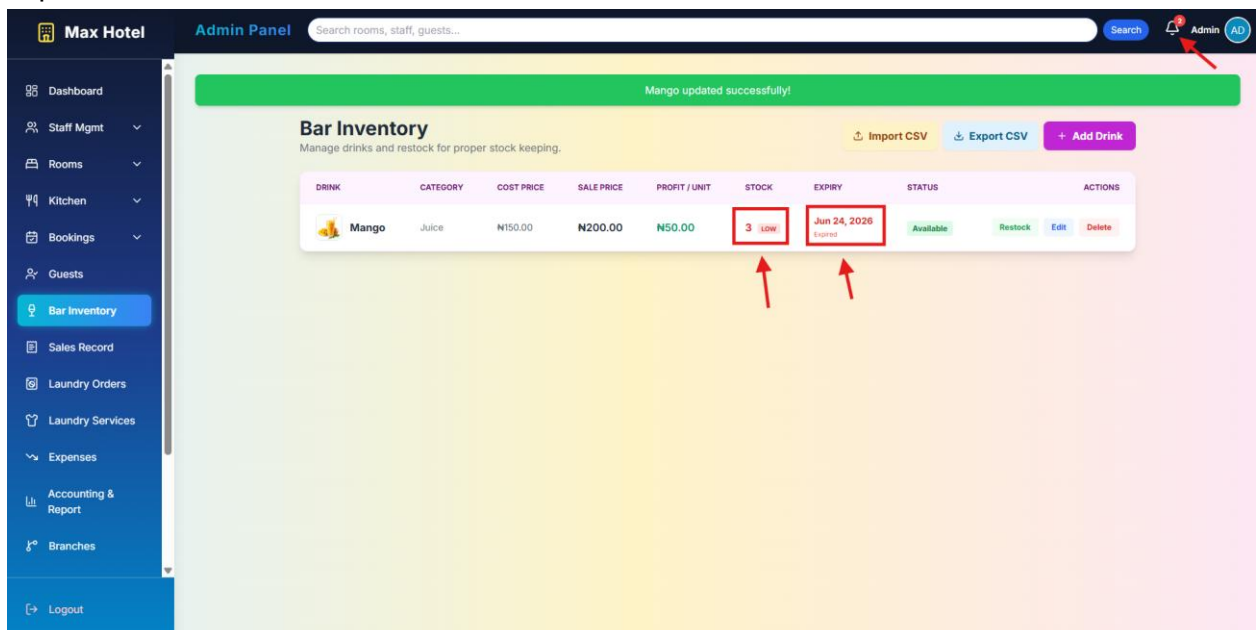

- Click to upload Room image isn't working on this page as shown below.

- Kindly add the option for guests to fund Credit wallet from the page shown below where they can transfer and upload the receipt here. And the admin, manager and front desk can view the uploaded receipt and confirm payment and add credit to their wallet balance for payment. And also add a date and transaction type filter to the page so guest can view transaction for a selected specific date range and choose the transaction either credit or debit.

- No notification came in when the product in the inventory was low in stock or expired.

- Add the option to view product history for a selected product in both the kitchen and Bar inventory that shows a breakdown of every sales, restock and update done on that product and how it arrive at the quantity left.

The image displays two screenshots of the Max Hotel Admin Panel, illustrating the implementation of a product history feature for both Kitchen and Bar inventory.

Kitchen Ingredient Inventory Screenshot:

The interface shows a sidebar with navigation options: Dashboard, Staff Mgmt, Rooms, Kitchen, Bookings, Guests, Bar Inventory, Sales Record, Laundry Orders, Laundry Services, Expenses, Accounting & Report, and Branches. The main content area is titled "Kitchen Ingredient Inventory" with a subtitle "Track stock levels, restock and expiry for kitchen ingredients." It includes buttons for "Import CSV", "Export CSV", and "Add Ingredient".

The inventory table lists the following items:

INGREDIENT	UNIT	COST / UNIT	STOCK	EXPIRY	STATUS	ACTIONS
Kings oil	Litre	N800.00	5.00	Jun 30, 2026	OK	History, view, Restock, Edit, Delete
Rice	Kilogram	N1200.00	10.00	Jun 28, 2026	OK	Restock, Edit, Delete
Tomatoes	Pieces	N250.00	15.00	Jun 25, 2026	OK	Restock, Edit, Delete

Bar Inventory Screenshot:

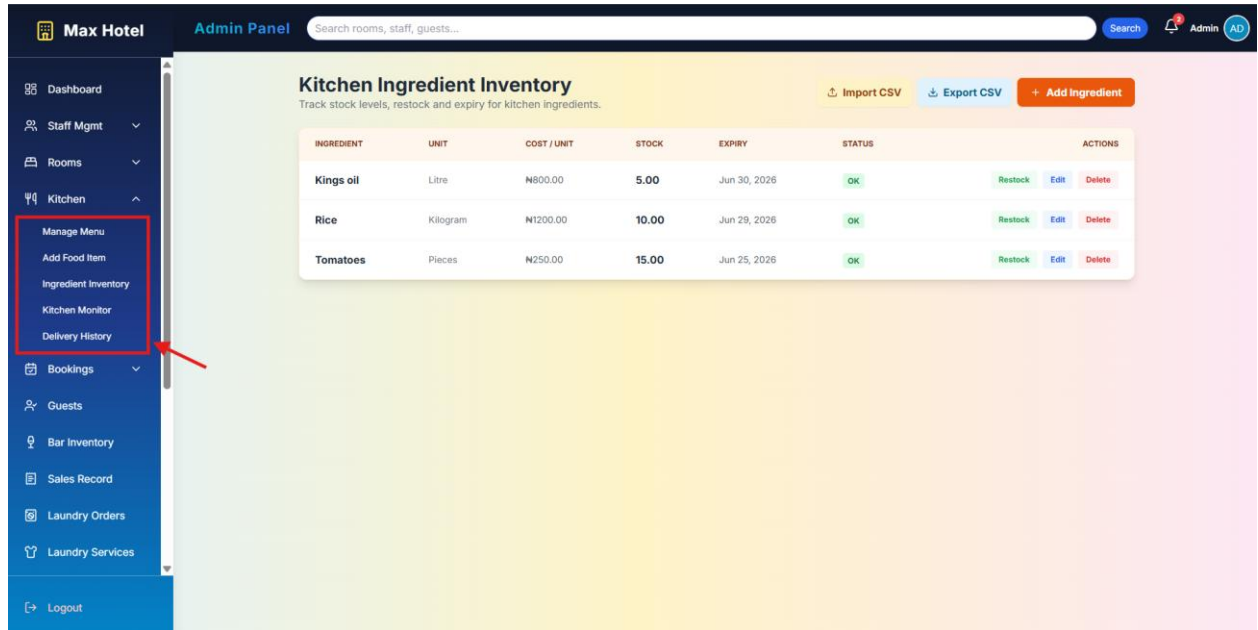

The interface shows the same sidebar, with "Bar Inventory" highlighted. The main content area is titled "Bar Inventory" with a subtitle "Manage drinks and restock for proper stock keeping." It includes buttons for "Import CSV", "Export CSV", and "Add Drink".

The inventory table lists the following items:

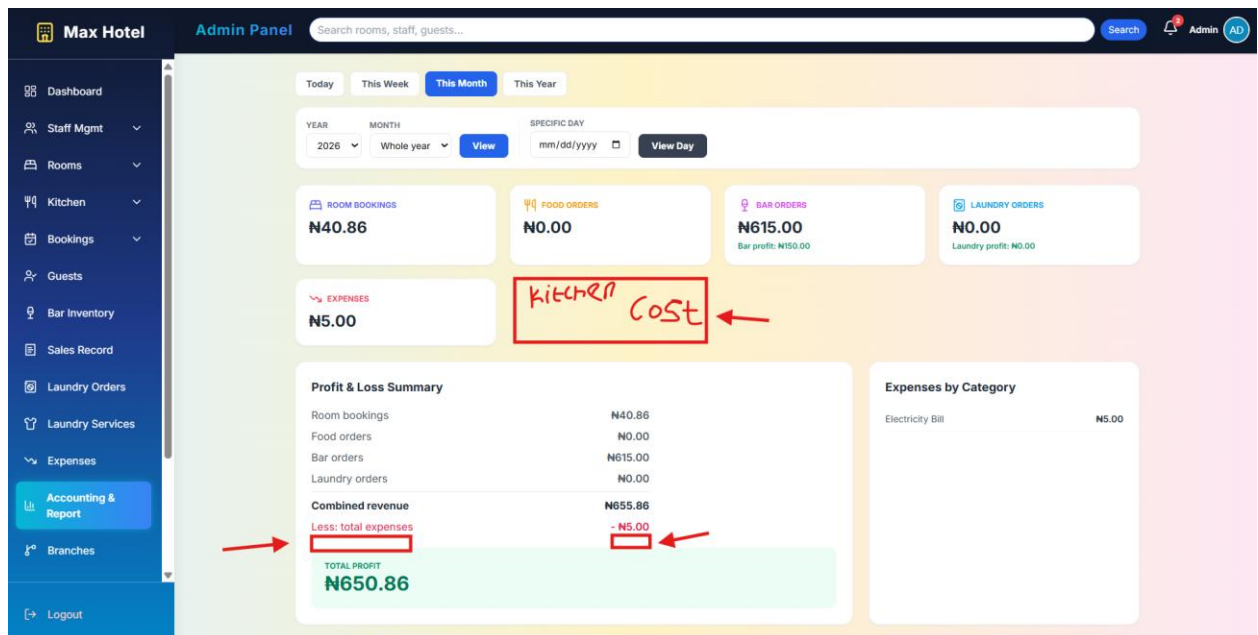

DRINK	CATEGORY	COST PRICE	SALE PRICE	PROFIT / UNIT	STOCK	EXPIRY	STATUS	ACTIONS
4th street	Wine	N1200.00	N3000.00	N1800.00	3	Sep 12, 2026	Available	History, view, Restock, Edit, Delete
Coke	Soft Drink	N400.00	N500.00	N100.00	4	Sep 11, 2026	Available	Restock, Edit, Delete
Mango	Juice	N150.00	N200.00	N50.00	6	Jul 11, 2026	Available	Restock, Edit, Delete
Orange	Juice	N500.00	N700.00	N200.00	5	Aug 11, 2026	Available	Restock, Edit, Delete

In both screenshots, the "History" and "view" buttons are highlighted with red boxes and arrows, indicating the new feature.

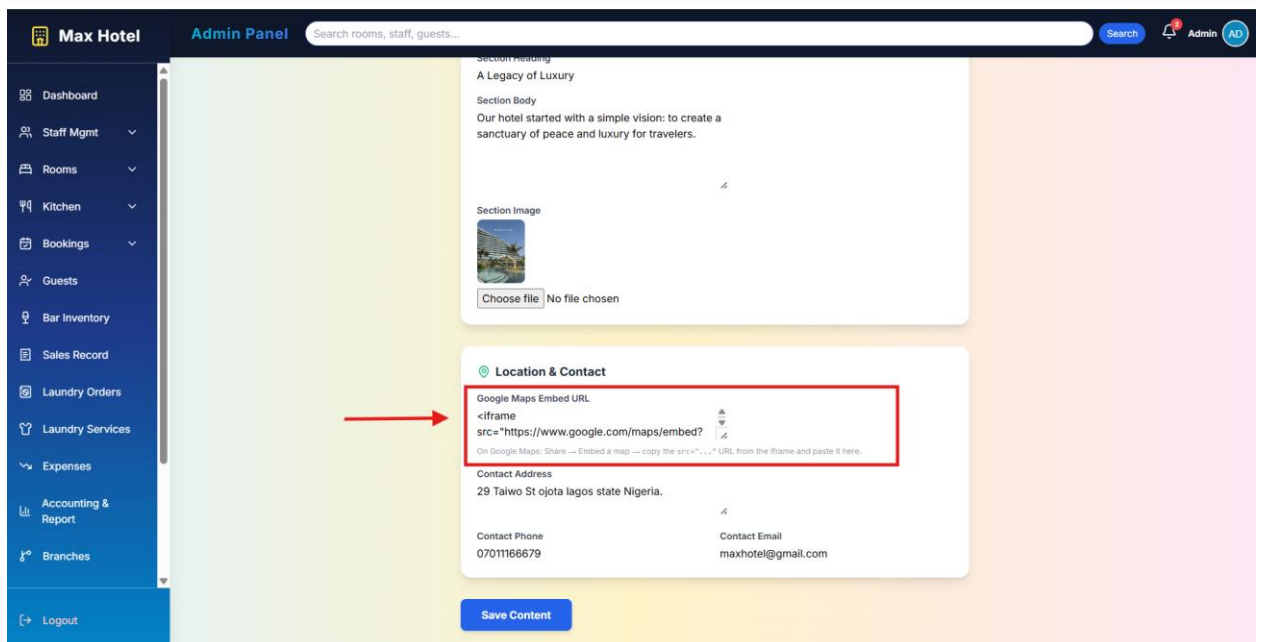

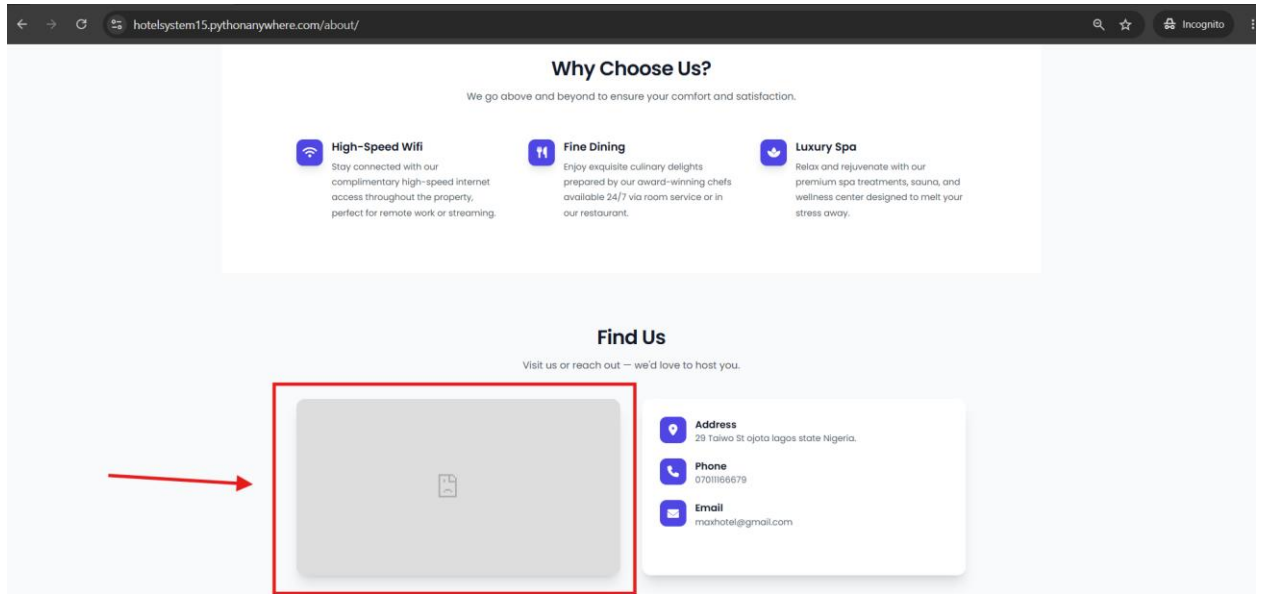

- Add a Kitchen ingredients Usage Tracker into the kitchen module where the chef or kitchen staff can select what has been used from the kitchen ingredient inventory for the day and the stock reduces from the ingredient inventory also include a date filter so you can view used ingredient records by dates, year etc.

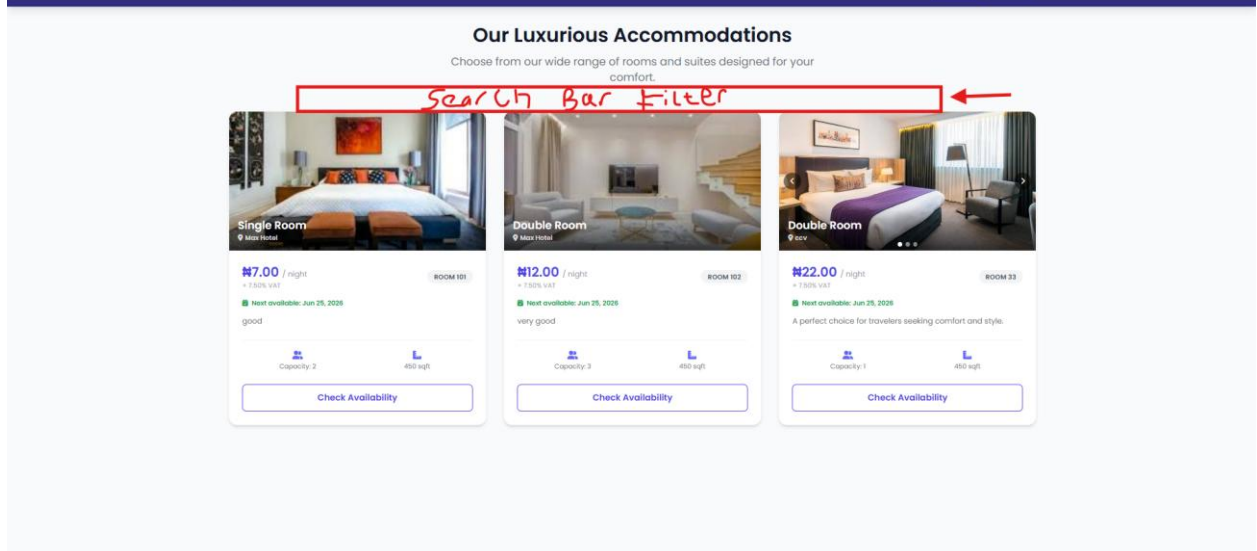

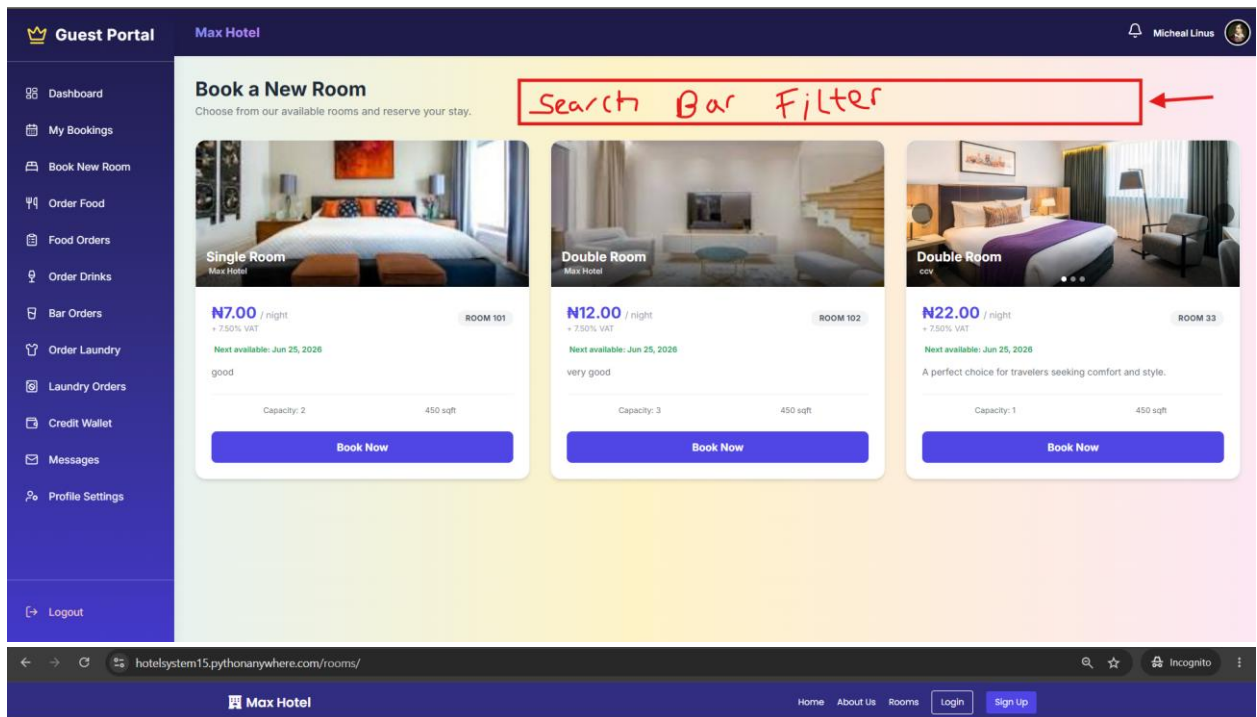

Also show the total cost of ingredient used so far in the Account and Report and it cost should be subtracted from the combined revenue as well

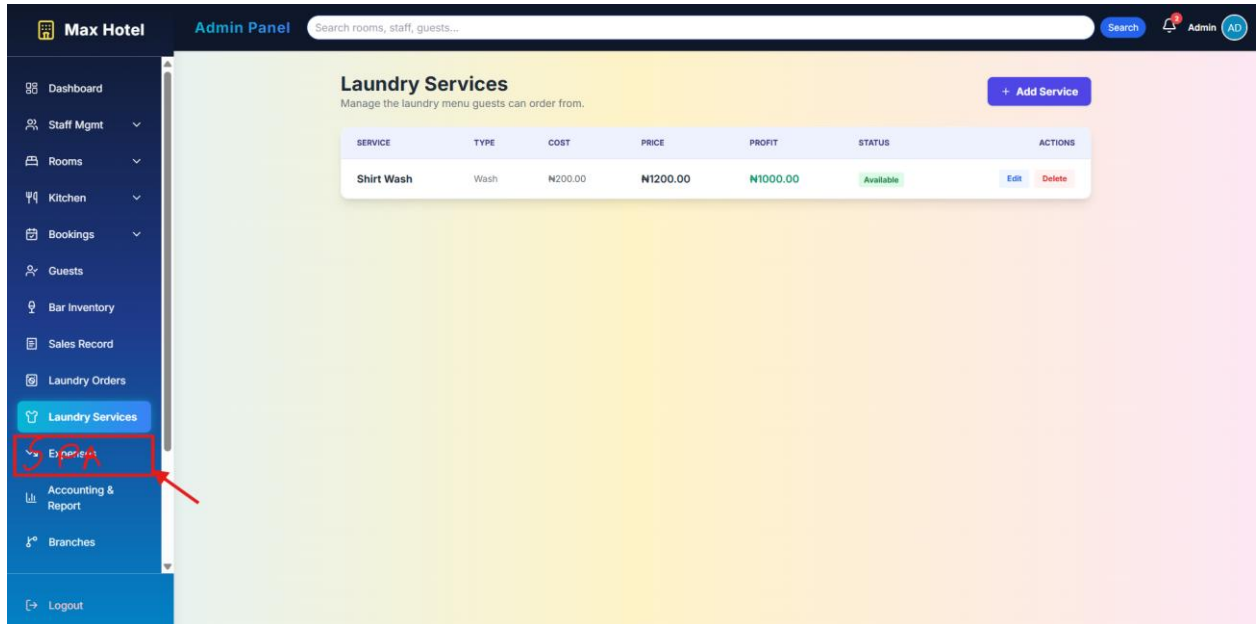

- The iframe embedded google maps viewing on the about page didn't work, it shows a refuse to connect to google error msg .

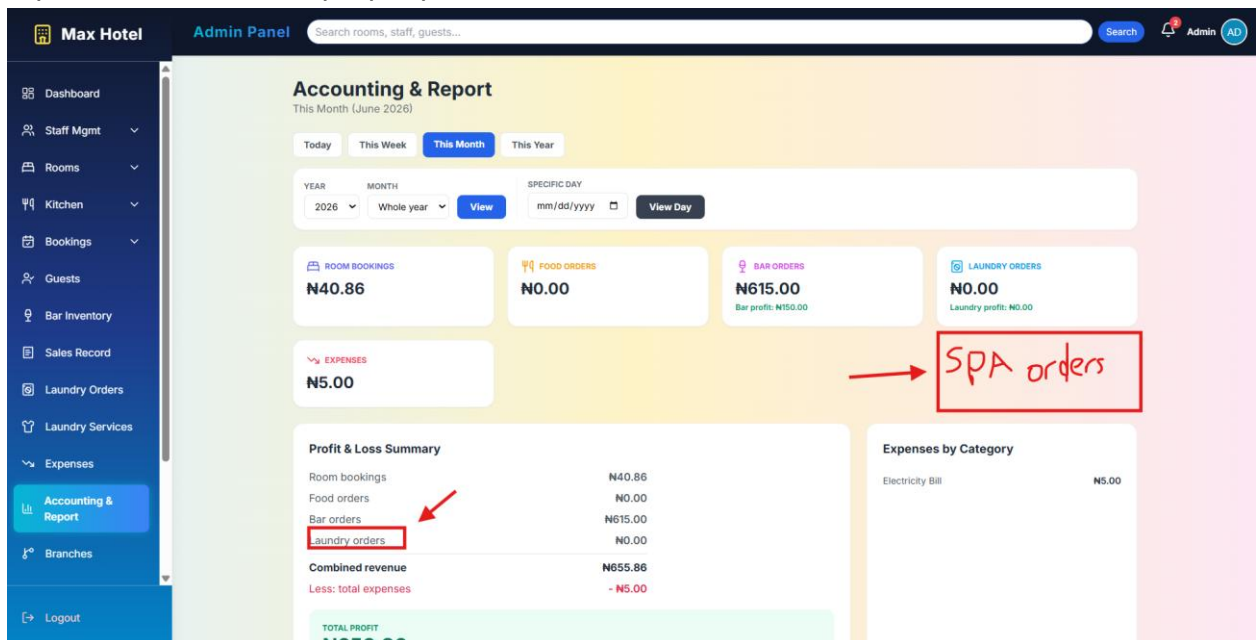

- Kindly add a search bar date filter that enables both login guest and non-login guest to easily filter through a long list of rooms to only show the once available for the date they filter check for.

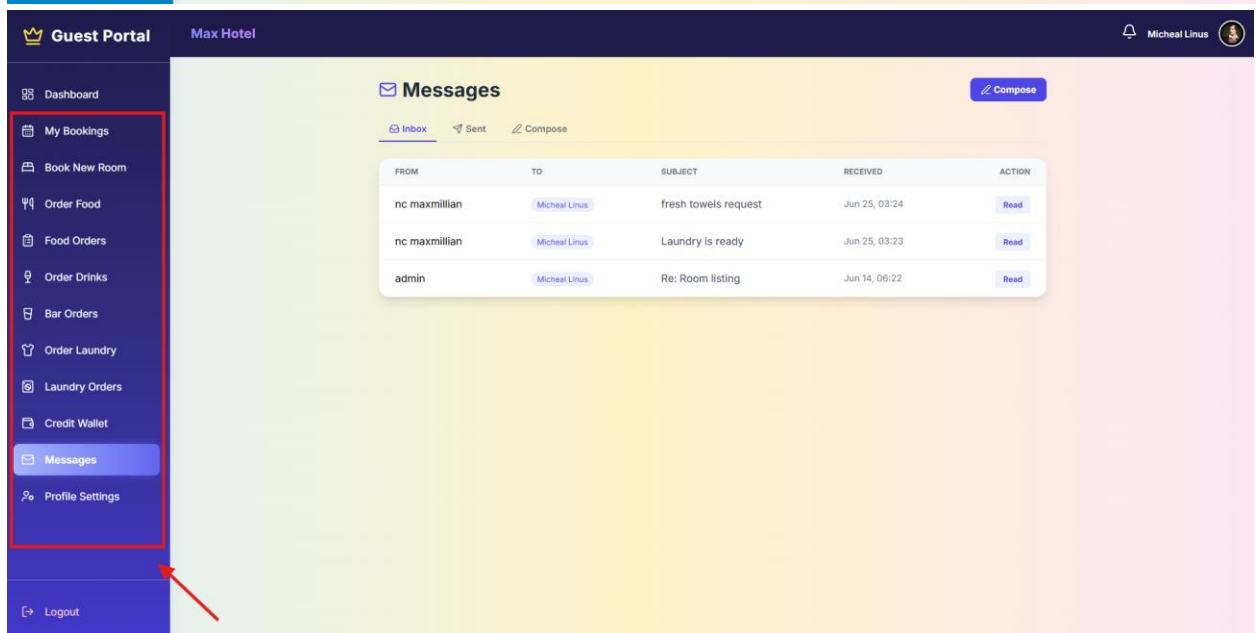

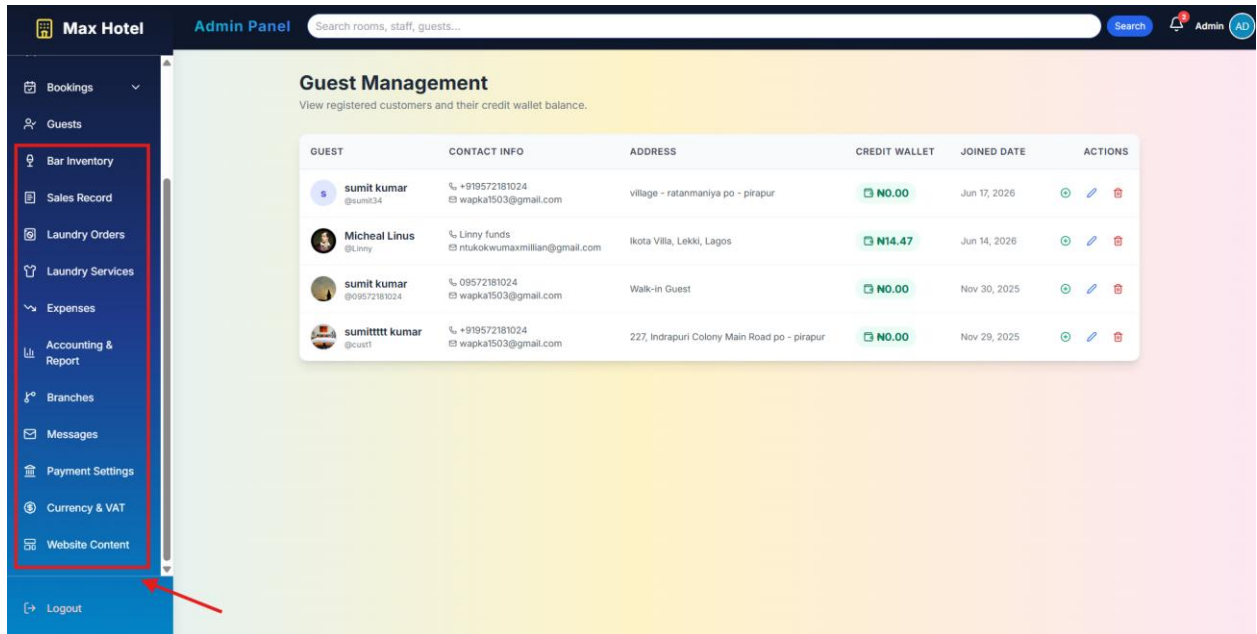

- Add a Spa module to the guest dashboard where Guest can select from Spa services available and place an order and the admin/ manager / receptionist and the Spa role can get the order and monitor it to mark as paid. Guests can also pay for SPA services with wallet credit.

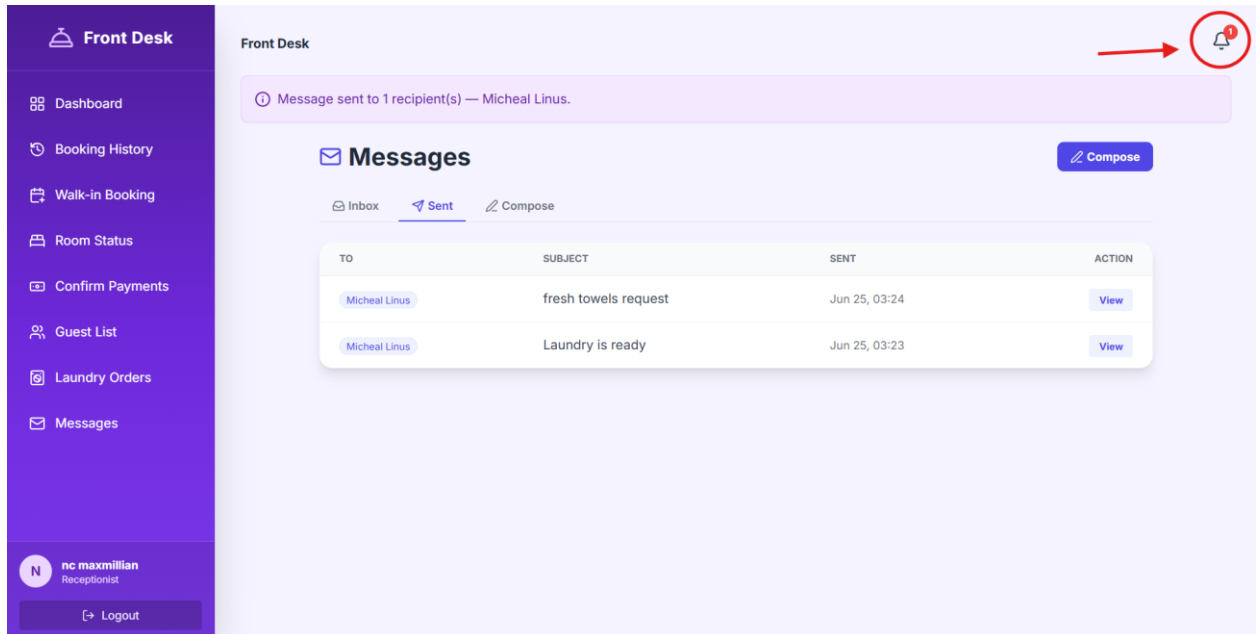

Also Include the revenue generated from the Spa orders to the accounting and report dashboard for a proper profit breakdown.

- Kindly organize and group the Dashboard menus into a simple dropdown for similar sections e.g.
- Laundry orders, SPA orders, Food orders, Bar orders. should all be a drop down of – ORDERS.
- Bar inventory, Kitchen ingredient inventory. Dropdown – INVENTORY.
- Order food, Order Drinks, Order Spa, Order Laundry. Dropdown – MENU & SERVICE.
- My Bookings, Book a new room. Dropdown – BOOKINGS.
- Payment Settings, Currency & VAT, Website Content. Dropdown – SETTINGS.

- Kindly allow the notification alerts to keep on ringing and making sounds every 2 minutes until it is checked and marked as read by the logged in user.

- Kindly add an AUDIT LOG Module under staff mgmt that only the Admin and Manager have access to which shows and track all activity logs or changes done by Staff on the system also add a filter to be able to narrow down the activity search.
