

HOTEL MANAGEMENT SYSTEM FINAL FEEDBACK 1.

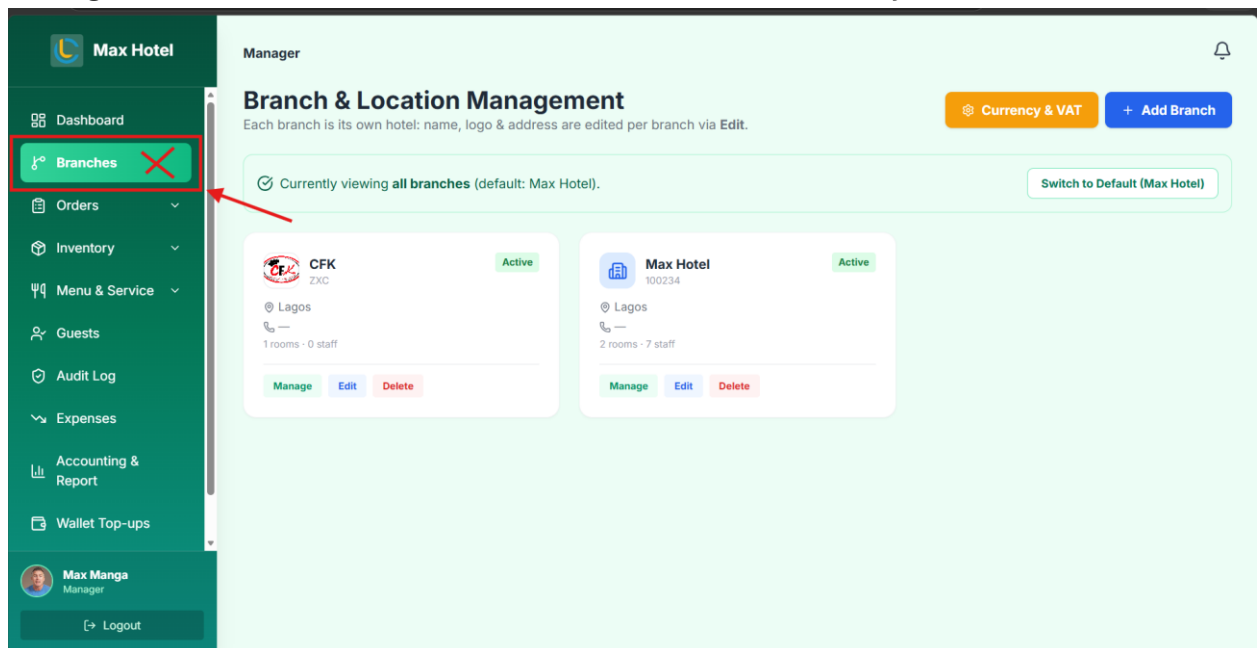

- Kindly add a search bar filter that enables both login guest and non-login guest to easily search for different hotels / shortlet by name, branch location and address Next date availability etc. Before selecting one for booking.
- Guest Bookings and orders when placed should be received by the hotel branch they are currently checked into.

- You didn't Include the revenue generated from the Spa orders to the accounting and report dashboard for a proper profit breakdown. Spa orders and spa profit should also be shown on the accounting and report page just the way laundry orders and profit are shown and calculated.

- Manager role should not have access to the branch's module only the admin.

- How ever the Manager can see and switch btw the branches that have been assigned to his account by the admin which means the highlight part in the image below should only show the locations assigned to the manager by the admin and the manager can then click on the locations to switch branch.
admin can assign multiple locations to a manager from his dashboard.
