

HOTEL MANAGEMENT SYSTEM FEEDBACK 2

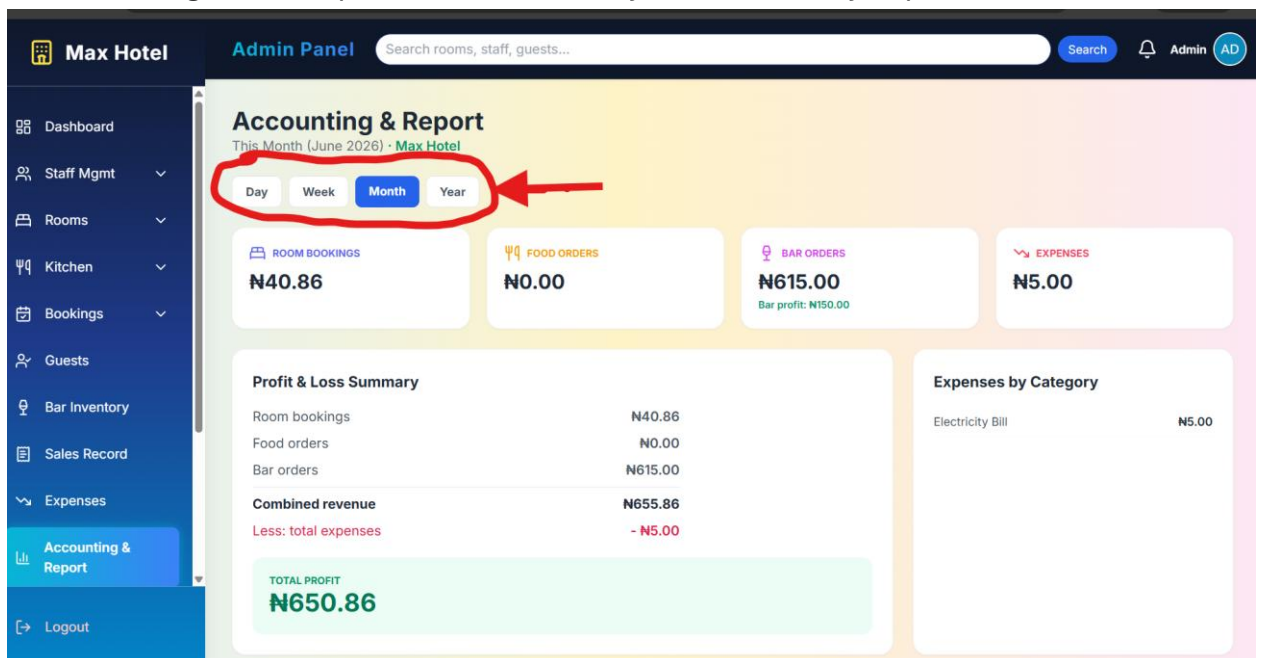

- Hotel Logo uploaded from branches settings isn't shown on the dashboard or on the booking website.

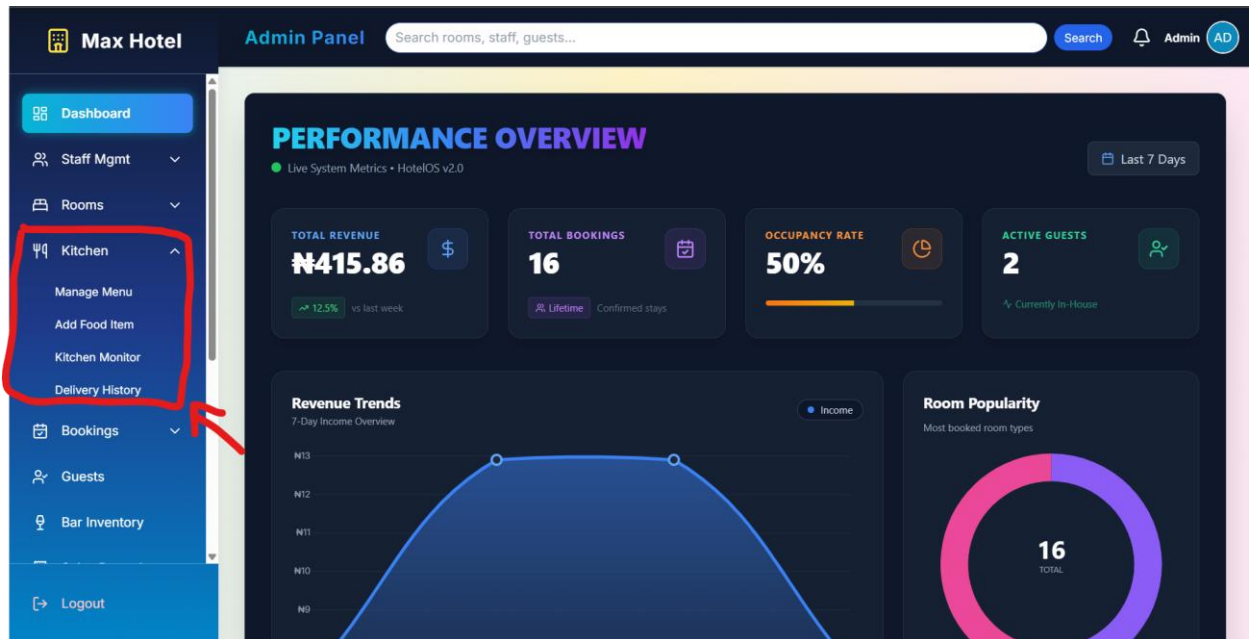

- The date range filter on the admin dashboard isn't working

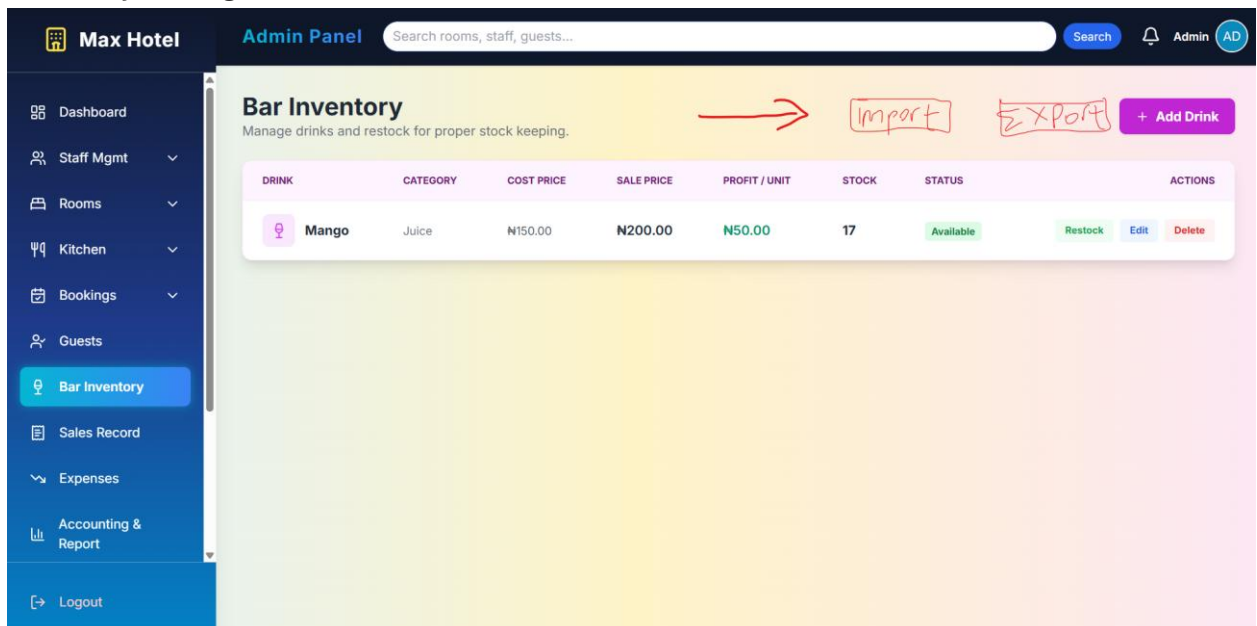

- Also add a date and Year filter to the Accounting & report page to enable the admin/manager to view previous and current year/ month/ day Reports as selected.

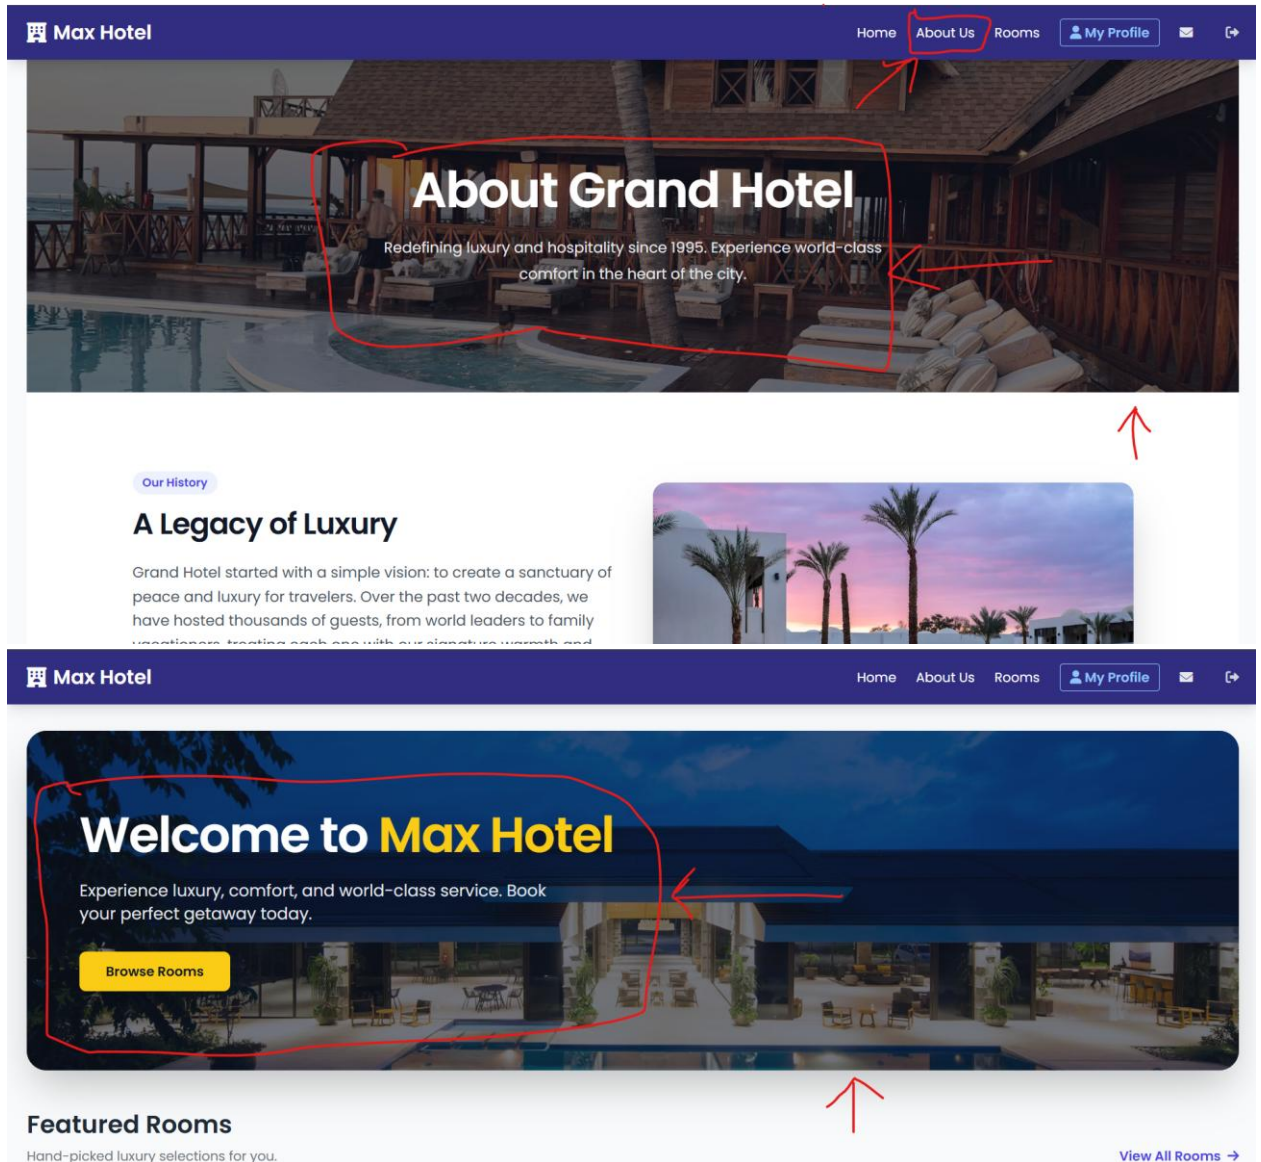

- Add an inventory management module for ingredients into the kitchen module

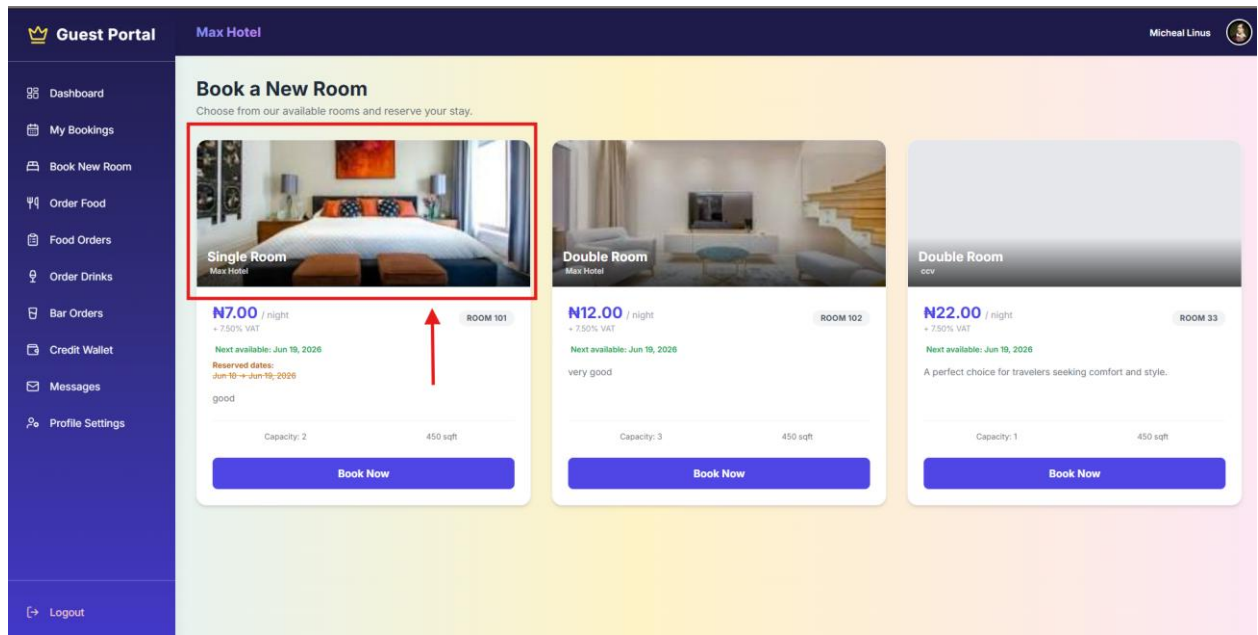

- Kindly add the option to bulk Import Bar product via CSV file template and option to export bar product list for update. Also add this option to the kitchen Ingredients inventory management module.

- Enable the admin to be able to edit content being displayed on the Home page and about us page. info on the hero section like image and text, map location of the hotel and contact info should be included in the about us page and option to edit it from the admin.

- Kindly Change the single image to a product image gallery Carousel where the rooms can show the different parts of a room in the images Uploaded by the admin.

- Add a Laundry module to the guest and housekeeper dashboard where Guest can select from laundry menu like they do with the kitchen menu options (wash, iron , starch , dry-clean, Sewing) etc. and place an order and the housekeeper / admin/ manager / receptionist can get the order and also monitor it to mark as paid.
Guest can also pay for laundry with wallet credit.
Also Include the revenue generated from the laundry orders to the accounting and report dashboard for a proper profit breakdown.
- Kindly add the following notification alerts written below to be displayed on the notification icon tab and let it be displayed to the relevant staff who need to get the alert and let the alert ring or make a sound once it drops.
 1. Bar product expiration Alert
 2. Kitchen ingredient and Bar Low product Alert due for restock
 3. New guest booking alert
 4. Cancelled booking alert

5. new message alert
6. new kitchen order alert
7. new bar order alert
